

HEALTHCARE DRY MOPPING

ELECTROSTATIC CLEANING

Disposable dry mopping sheets

Where can you use these products? Key departments within a Hospital

- » Infection Control
- » Environmental Services
- » Nursing
- » Health and Safety
- » Green Committee

Potential Business Needs

- » Reducing dust and other allergens to maintain high cleanliness throughout the building
- » Decrease the risk for slip and fall
- » Dry dusting prior to wet mopping is the most efficient way to clean floors
- » Reduction in laundry cost
- » Reduction in chemical usage
- » Reduction in cross contamination

Key Benefits to Meet these Needs

- » Draws and locks in dust and other allergens on a microscopic level
- » Helps reduce cross contamination if 1 dust sheet per room method is implemented
- » No need for chemicals
- » Biomop™ and Dynamop are both disposable so no need for laundry
- » Biomop is biodegradable
- » Lightweight for maximum user efficiency

Probes to Uncover these Needs

- » Are you interested in improving the air quality in your facility?
- » Would you like to improve the efficacy of your dust mopping program?
- » Is controlling cross contamination important to your facility?
- » Are ergonomics important to you and your staff?
- » Are you looking for green technologies?
- » Would you like to reduce costs associated with laundering dust mops?

SITUATION	NEED	SOLUTION	BENEFIT
Dust Mopping	Biodegradable dry mopping	AGF #70143 BioMop	Disposable, Biodegradable, electrostatic dry mopping.
Dust Mopping	Disposable dry mopping	AGF #143 Dynamop	Economical disposable dusting sheets. Improved cleaning efficiencies versus traditional dust mopping

AGF #143 Dynamop
